NEWS RELEASE:

Disa Digital Safety Pte Ltd bows new Serialization Technology Solution

Singapore, 20 December 2016 – Equation Summit Limited's wholly-owned subsidiary, Disa Digital Safety Pte Ltd ("DiSa"), a Singapore-based Asset Protection solution provider is pleased to announce that DiSa has introduced a complimentary patent-pending Asset Protection solution named Serialization with effect from 20 November 2016. Utilizing the existing DiSa PoSA platform, DiSa is now able to itemize every product sold at a major retailer and provide support to retail partners and prevent return fraud. Return fraud is the fastest growing form of shrink and the most difficult form of shrink for retailers to combat.

The Serialization solution is created from the existing backbone infrastructure that DiSa employs for Point-of-Sale Activation Benefit Denial technology. The Serialization solution will allow DiSa to penetrate additional product categories and offer significant potential to increase retail partnership, while making it simple for global manufacturers to participate.

The application will allow retailers to:

- 1) Fully authorize returns;
- 2) Offer a 'hard decline' to a fraudulent return; and

3) Communicate to the consumer that the unit was not purchased at this retailer, but will allow the associate to direct the consumer to the correct retailer

The DiSa solution is the world's first digital asset protection solution and is now building out into the 'first-of-a-kind' ('**FOAK**') digital asset protection platform. The DiSa solution offers end-to-end protection against theft and protects the retail asset from the point-of-production to the point-of-sale. The DiSa solution is a low-cost solution that increases efficiency both in the supply chain, in the front and back of retail stores around the world. The FOAK allows retailers to move to a completely digital platform and solve yet another gap that has been utilized by offenders to create shrink. Not only will this solution allow retailers to sell more by increasing in-stock items (top line revenue), it will also decrease shrink (helping the retailer bottom line).

The solution is safe, digital and is being deployed at major retailers on a global footprint. DiSa will continue to research and develop new technologies, new solutions from a single digital low-cost platform that creates sales opportunities, drives efficiency gains and improves the retail shopping experience.

About Disa Digital Safety Pte Ltd

Disa Digital Safety Pte Ltd is a Singapore-based technology solutions provider that specializes in research and development of cutting-edge security ("DiSa Asset Protection System") and digital authentication ("QuickCheck") solutions.

DiSa Asset Protection System, the world's first anti-theft protection technology a digital lock on consumer electronic products. DiSa Asset Protection System allows the manufacturers and retailers of consumer electronic products to prevent theft by integrating DiSa Asset Protection System codes into their products during the manufacturing process by making it inoperable at the point-of-manufacturing until the point-of-sale at retail stores.

DiSa Asset Protection System has won several awards for technology innovation including two recognition of Achievement Awards for its innovative features at the 2009 Plus X Award Technology Conference in Cologne, Germany.

QuickCheck is a digital authentication solution that is capable of verifying the authenticity of a product instantaneously. It allows the consumers to validate the authenticity of a product in real time prior to a purchase decision via their own devices. This is done through the scanning of a unique barcode ("QC Code") that is applied or printed on the packaging of the products. All it takes to authenticate is a smart phone with location service.
