Our revenue decreased by US\$0.2 million, or 7.6%, from US\$3.2 million in 1Q2017 to US\$3.0 million in 1Q2018, mainly due to the decrease in revenue generated from per unit of Chocolate® PTA sold to Medtronic, Inc. (“**Medtronic**”) following the completion of the asset sale in January 2018 (“**Sale**”). Such revenue generated from Medtronic in 1Q2018 is in relation to the product manufacturing and supply agreement, which forms part of the Sale. In addition, revenue generated by our direct sales team decreased by 8.9% in average sales per sales representative from US\$112,931 in 1Q2017 to US\$102,896 in 1Q2018 as the direct sales team only sold the Group’s coronary products in Q12018 while in Q12017, the direct sales team sold both the Group’s coronary products and Chocolate® PTA prior to Medtronic taking over the distribution of Chocolate PTA in late Q12017.

Cost of sales increased by US\$0.2 million, or 9.6%, from US\$2.0 million in 1Q2017 to US\$2.2 million in 1Q2018 was mainly due to the increase in sales units of Chocolate® PTA during the period to Medtronic.

As a result of the above, our Group recorded a gross profit of US\$0.8 million or 26.9% of revenue in 1Q2018 as compared to a gross profit of US\$1.2 million or 38.4% of revenue in 1Q2017.

In 1Q2018, the Group’s profit before taxation was US\$24.6 million as compared to a loss before tax of US\$8.8 million in 1Q2017. The analysis of the profit before taxation are as follows:

- Our sales and marketing expenses decreased to US\$1.1 million in 1Q2018 mainly due to lower direct sales personnel costs in 1Q2018 as a result of lower sales commissions and a decrease in headcount.

- Our administrative expenses decreased to US\$1.4 million in 1Q2018 mainly due to lower headcount and reduction in overall spending due to cost cutting measures implemented since last year as well.
- Our research and development expenses increased to US\$1.7 million due to the focus by the Group on the development and clinical trials of its drug-coated peripheral Chocolate® (i.e. Chocolate Touch®).
- Other income increased by US\$27.7 million in 1Q2018 mainly due to the completion of the sale of Chocolate® PTA to Medtronic in January 2018.
- Other expenses of US\$0.1 million in 1Q2018 mainly due to expenses recognised for professional fees in relation to the transaction with Medtronic.
- We were in a net finance income position of US\$0.4 million in 1Q2018, as compared to a net finance cost position of US\$4.9 million in 1Q2017 mainly due to a decrease in interest expenses to US\$0.2 million in 1Q2018 (1Q2017: US\$3.9 million) mainly due to the settlement of a majority of the convertible and exchangeable notes as well as short term loans. The decrease in net finance cost was also due to the foreign exchange gain of US\$0.5 million in 1Q2018 (1Q2017: US\$1.0 million foreign exchange loss) pursuant to exchange rate changes between the Singapore dollar and United States dollar.

The Group had a positive working capital of US\$0.1 million as at 31 March mainly due to the settlement of certain convertible and exchangeable notes and loans and payables amounting to US\$6.8 million and current trade and other payables of US\$13.3 million following the receipt of proceeds from the completion of the sale of Chocolate® PTA to Medtronic in January 2018.

In addition, on 5 February 2018, the Company announced that it had entered into a non-binding term sheet with a multinational corporate for the potential disposal for the Company's coronary products ("Potential Disposal").

Our non-current assets decreased by US\$0.2 million mainly due to the amortisation of intangible assets of US\$0.2 million in relation to our developed intellectual properties such as Chocolate® PTA and Chocolate XD®.

Our current assets increased by US\$4.5 million mainly due to the increase cash and cash equivalents of US\$5.6 million as a result of the completion of the sale of Chocolate® PTA to Medtronic and the settlement of the Group's trade payables and debt obligations. The increase is partially offset by the decrease in inventories of US\$0.6 million due to utilisation of inventories for production, and trade and other receivables of US\$0.5 million mainly due to collection of sales proceeds from customers.

Our current liabilities decreased by US\$21.3 million mainly due to the decrease in (i) trade payables and accrued expenses of US\$8.7 million, (ii) loans and borrowings of US\$6.8 million due to settlement of these obligations via the use of the proceeds received from the sale of Chocolate® PTA to Medtronic and (iii) payment of US\$4.25 million final settlement to AngioScore, Inc.. The decrease is also due to the reduction in deferred income of US\$1.2 million which was also repaid during the period following the cancellation of a contract.

CONSOLIDATED STATEMENT OF CASH FLOWS

Cash Flow Analysis 1Q2018

The Group recorded cash outflows from operating activities of US\$16.6 million for 1Q2018 which was a result of an operating loss before working capital changes of US\$3.3 million and a net cash outflow as a result of changes in working capital of US\$13.3 million. The decrease in working capital changes was mainly due to the decrease in trade and other payables of US\$13.1 million and deferred income of US\$1.2 million. The decrease in working capital changes was partially offset by the decrease in inventories and, trade and other receivables of US\$0.6 million and US\$0.5 million respectively.

Cash generated from investing activities for 1Q2018 was approximately US\$28.0 million which was mainly due to the completion of the sale of Chocolate® PTA to Medtronic.

Net cash outflow from financing activities for 1Q2018 was US\$5.8 million which was mainly due to repayment of short-term loans of US\$2.5 million and convertible and exchangeable notes of US\$4.9 million. The cash outflow from financing activities was partially offset by the proceeds received from the shares issued to GEM Global under the capital commitment agreement of US\$1.1 million and proceeds from short term loans from third parties of US\$0.5 million.

10. SIGNIFICANT TRENDS AND COMPETITIVE CONDITIONS OF THE INDUSTRY

A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.

Mergers and acquisition activity in the medical technology sector continues to ramp up. Major strategic players in the space have completed or are in the process of completing acquisition/merger activities. These activities are expected to continue throughout 2018 with Medtronic starting off the year with the acquisition of the Group's Chocolate® PTA balloon catheter asset.

Both the coronary and peripheral vascular markets continue to offer significant opportunity for new devices that will better treat complex disease than existing therapies. These are the segments which offer the greatest value potential for Chocolate Touch®, Chocolate XD® and Chocolate Heart™ technologies.

As was evidenced repeatedly through lectures and live cases at two of the recent, most prestigious interventional physician conferences - the TCT 2017 Conference, held in Denver, Colorado, USA and LINC 2018, held in Leipzig, Germany, the coronary and peripheral intervention markets share one common clinical challenge that can negatively affect patient outcomes which is the increasing incidence of arterial calcium¹ due in part to the advanced age of patients undergoing procedures and the increase in diabetes.

In coronary procedures, the presence of arterial calcium creates challenges for clinicians to properly deliver drug eluting stents (“DES”) (the standard of care for Coronary PCIs), negatively impacting the uptake of the drug and clinical outcomes¹. As presented by Dr. Ehtisham Mahmud of University of California, San Diego, there is a clinical need for “Vessel Preparation” in the presence of calcium prior to stenting. As a potential, highly effective solution to this need, Dr. Mahmud presented the use of Chocolate XD® balloon¹. The need for Vessel Preparation prior to use of DES when facing arterial calcium was a consistent theme at TCT.

At LINC-2018, with a focus on peripheral interventions, there was an interesting parallel where Drug Coated balloons (“DCBs”) are becoming the standard of care in this market, yet, DCBs also face the same challenge with regards to arterial calcium. Physician thought leaders delivered a consistent message about the need for “Vessel Preparation” to treat arterial calcium prior to DCB². Dr. Christopher Metzger, an interventional cardiology physician thought leader from Kingsport, Tennessee, USA, shared with the audience during his presentation that one of the major limitations of endovascular treatment, especially with Below the Knee (BTK) disease, is arterial calcium. As stated, “Calcium is a potential

barrier to optimal drug absorption” (by DCBs)³. He also shared while leading a physician panel: “With the Chocolate® technology, I consistently get what I’m looking for with these complex lesions: large lumens with minimal dissection and rarely the need for bail-out stenting and I often use Chocolate® for Vessel Preparation prior to DCB.”³

The Group is well positioned with the highly differentiated Chocolate® technology to benefit from the increasing needs for Vessel Preparation and better DCB technology in the Peripheral Vascular and Coronary markets. The Group’s drug-coated peripheral balloon, Chocolate Touch®, had its first enrollment in the FDA approved pivotal trial in 2017. Upon completion of the trial and subsequent approval, this would make Chocolate Touch® the fourth such device to be approved in the US and the first with a differentiated platform and a clinical trial versus a commercially available drug-coated balloon. The final results of Chocolate Touch®’s first-in-human trials were announced in 2016 and demonstrate data that are similar to the best-in-class devices. On a related note, the clinical success of the Group’s latest generation coronary device in the US, Chocolate XD®, bode well for supporting robust sales growth in 2018 and beyond. Lastly, the Group’s drug-coated coronary balloon, Chocolate Heart™, completed two year angiographic follow up for its first-in-man (FIM) study in the Dominican Republic. The results of this follow up exceeded expectations, showing a negative late lumen loss at 24 month which even the best drug eluting stents are not able to show. The Group anticipates commencing a safety and feasibility study in 2018, and following which, FDA approval will be sought for Chocolate Heart™ to be the first drug-coated balloon approved for broad coronary use in the US.

The Company continues to explore various strategic options including, mergers, acquisitions, disposals, joint ventures and fund raising activities to optimise and/or unlock value for shareholders. The Company had recently completed the sale of the Group’s non-drug coated peripheral balloon, Chocolate® PTA to Medtronic for a sum of US\$28 million and the Company have been in negotiations with a multinational corporation in relation to the sale of the Company’s coronary products with a view to enter into definitive agreements. The Company will update shareholders via SGXNET as and when there are any material developments on the aforementioned.
